

# Weed / Disease Control, Chemicals and Agri Systems

Healthy Soils Incorporated Presents

Toowoomba 26th July - 8.30 am - 5.00 pm

Rockhampton 28th July - 8.30 am - 5.00 pm

Cost - \$60.00 per person (normally ~~\$250.00~~)  
meals included

## Key presenters:

**Emeritus Professor Don Huber** is one of the worlds top plant pathologists with nearly 50 years experience researching cereal crop diseases and biological impacts. Dr Huber will present the latest information on glyphosate and other chemical impacts as well as genetically disease / nutritions interaction.

**Dr Lukas Van Zwieten** is a Principal Research Scientist for the NSW DPI, investigating the impact farm chemicals are having on farming soils in Australia. Lukas will discuss results of a GRDC research project presenting at Toowoomba only.

**Dr Michael Rose** is a Senior Soils Researcher with NSW DPI and will present the results of the GRDC research project showing the impact of chemicals on farm soils. (Presenting at Rockhampton only)

## Who should attend

Farmers, gardeners, agronomists, families.

## Key Topics

- Glyphosate and its impact on soil, microbes and plants?
- Chemical residues and buildup?
- Weed resistance tools
- Disease / nutrient interaction
- What chemicals are building up in our soils (Aust data)?
- How do we minimise the chemical buildup?
- What options do we have for future weed control?
- How do we build healthy soils and healthy crops?

## Presenters

**Professor Don Huber**  
**Dr Lukas Van Zwieten**  
**Dr Mike Rose**  
**Other Speakers TBA**

Bookings Essential please contact -
