- **BYO Lunch and a chair**
- **Smoko supplied.**

**To Book in – Phone or text your details to Mick on  
0438395255**

### **Who is Peter Andrews?**

Peter is the person who developed the model now called Natural Sequence Farming (NSF). NSF will stop the decline in our soil and plant health and reverse the decades of degradation, that we see every day. We will cover:

- Understanding principles
- Reading the landscape (steps)
- Planning on maps
- Designing / constructing contours
- Designing / constructing ponds
- Getting plants established
- Managing livestock

### **TEN Years Ago.**

The first NSF workshop was held on Bindaree in 2016 where PA advised on options.

This field day will include comparison of works completed in 2016, contour banks completed in 2021 and 2024 and the most recent works including a demonstration during the field day. This is the final activity being run as part of a Peer to Peer QDPI project with our Healthy Soils group. We would welcome experienced practitioners and beginners as we can all learn from each other.
