

Field Day - Moura 6th June 2015

Naturally Energetic Grazing Systems with Ms Debbie McBryde

Healthy Soils Inc Presents

How to improve pasture and animal health using natural energy systems in CQ and make a profit (\$).

Overview - be quick to book (limited numbers)

Oombabeer, Moura operates as a growing and finishing property which turns off high quality MSA graded cattle to local meatworks. Debbie's and property manager, Mervyn Mason's success has been highlighted in both the Qld Countrylife newspaper and the MLA Feedback magazine for their ability to meet market specifications using bought in cattle. Deb will be speaking about the tools she uses to improve animal, soil, plant and human health within her business. A great opportunity to ask questions and tour the property.

Who would benefit

Anyone who directly or indirectly is linked to primary production including:

Farmers, graziers, consultants and extension staff

Discussion areas

- What tools can we use to improve soil/ plant/ animal health?
- What is natural energy?
- What is radionics/ biodynamics/ organics?
- How does free choice supplementation work?
- How do you meet MSA / PCAS specifications?
- How do we make a start?
- What changes can I make in my grazing/ farming system?
- How does biology impact my grazing?
- How relevant is soil biology to me?
